CEILINGS

**Innovative products  
make innovative projects.**

Forty years ago, we pioneered suspended metal ceilings. We've been hard at work ever since, developing products to meet the demands of innovative architects and designers. We've crafted a comprehensive range of Luxalon® Metal Ceilings that excel in design and performance, with solutions from Linear and Wide Panel to Curved, Plank, and Tile. Each is available in a variety of styles, colors, and finishes, guaranteeing that no matter your vision, we've got the look you're after. Just dream it up. We'll be ready.

# Go with the grain.

We don't believe creativity should be stifled by the limitations of material. That's why we've created ceilings that offer the look of wood with the convenience and performance of metal. Products like 84R, Open Cell, and the Box Series of Linear metal ceilings are available in a variety of finishes, from real wood veneers to amazing laminates, allowing you to create looks you never thought possible.

*Left:* Plainfield Medical Center, Indianapolis, IN  
Architect: BSA Lifestructures  
Product: Box 4, veneer: Maple

*Right:* GSO Day Theatre & Arts Complex, Greensboro, NC  
Architect: Calloway, Johnson, Moore & West, PA  
Product: 84R, veneer: White Oak

Luxalon® Plank and Tile ceilings by Hunter Douglas blend style and functionality, offering a clean, monolithic look and a variety of options. Our precision engineering results in consistently flat panels. Lay-In, Snap-In, Hook-On, and Torsion Spring Plank and Tile systems offer optimal access to the plenum. Various perforation patterns, sizes up to 2' x 10', and the availability of exterior applications ensure that everyone can have their own sense of Tile.

## It's hip to be square. Or rectangular.

*Far Left:* Austin City Hall, Austin, TX  
 Architect: Antoine Predock and Cotera Kolar Negrete & Reed

Product: Curved Solutions 250, color: Natural

*Far Right:* Ricardo Cumming Metro Station, Santiago, Chile  
Architect: Gubbins Architects and Burmeister Consultants  
Product: Curved XL Panel

## Ahead of the curve.

Luxalon® Curved Products bring artistic freedom to the forefront. Panels up to 2' x 8' allow you to define spaces both large and small. A growing design trend, these panels feature excellent acoustical properties and a variety of arch-lengths and radii that are perfect for creating arches and multilevel designs.

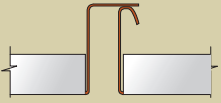

# Impressive size. Impressive look.

Our 300mm Wide Panel ceilings create a distinct, smooth look. We offer a selection of cost-effective options to suit your project, including interior and exterior applications, perforations that provide exceptional acoustical performance, lengths up to 19'6", and three distinct joint details. Whether you prefer a defined reveal or a monolithic finish, Luxalon® Wide Panel is the quick way to make a big first impression.

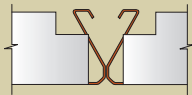

## 300A

Clean 10mm wide reveal

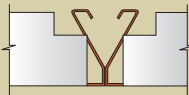

## 300C

Neat V-joint

## 300L

Monolithic square edge

*Middle:* Told & Skat Toldburen, Naestved, Denmark

## In line with style.

# LINEAR

No matter your style, Linear has the looks you love. Choose from a multitude of available colors or mix and match different sizes to create the perfect look for your project with our universal carrier system. Select a curved carrier or play it straight. Our Linear ceilings give you the freedom to create, whatever your project's needs.

 Product: 300L

Reebok World Headquarters, Canton, MA  
 Architect: NBBJ Architects of Seattle  
 Product: 300C

Why keep your vision locked inside? Bring style outdoors with our Exterior Soffit ceilings. These products create a variety of distinct looks and are engineered to withstand severe weather conditions. Perfect for canopies and porte-cocheres, our Linear, Wide Panel, Plank, and Tile systems are all available for exterior usage.

# The great wide open.

Our Open Cell ceilings provide the widest selection of patterns, configurations, and colors, inviting you to exercise your creativity. Both our Open Cell and larger Cell Frame ceilings offer a clean fit, establishing a monolithic visual plane. In addition, our Cell ceilings provide access to lighting, ventilation systems, and sprinklers, ensuring form doesn't get in the way of function.

*Above:* Retail Space, Las Vegas, NV  
Architect: Pavlik Design Team

Architect: HOK  
Product: Metal Screen/Baffle

*Right:* Lynnhaven Mall, Lynnhaven, VA  
Architect: Copeland, Novak & Israel  
Product: Metal Screen/Baffle

BAFFLE

## Get baffled.

Luxalon® Baffle ceilings emphasize versatility. Our adjustable carrier allows Baffles to slide back for easy access to lighting, sprinklers, and diffusers. Use Baffle ceilings as a one-way plenum mask or to create interesting lighting effects. Utilize Baffle on its own or incorporate other Luxalon metal ceilings in adjoining areas for a comprehensive design.

## Super-size your ceiling.

We've borrowed technology from the aircraft industry to create Luxalon® XL Panels, which span up to 5' in width and 15' in length. Despite their size, XL Panels remain flat, light, and need minimal supporting points. Clean, monolithic panels provide a smooth appearance and are available in a variety of finishes. Ideal for convention and transportation centers, sports arenas and educational establishments, they're the latest in a history of big ideas.
